Reviews

The most effective pdf i ever read. it absolutely was writtern extremely flawlessly and useful. I am very easily will get a pleasure of reading through a published book.

(Prof. Vidal Ledner)

MEDICARE: AN ASSESSMENT OF HCFAS 1988 HOSPITAL MORTALITY ANALYSES PEMD-89-11BR

Bibliogov. Paperback. Book Condition: New. This item is printed on demand. Paperback. 42 pages. Dimensions: 9.7in. x 7.4in. x 0.1in. In response to a congressional request, GAO examined the Health Care Financing Administrations (HCFA) 1988 analysis of Medicare hospital patient mortality. GAO found that HCFA: (1) modified the composition of the 17 diagnostic categories for Medicare patients to reduce the variation in the mortality rates associated with the individual diagnoses; (2) reported outcomes for each hospital over several years, rather than a single year; and (3) initiated studies to validate its analytical approach. GAO also found that the HCFA analytical approach: (1) failed to account for the wide variations in mortality rates of the principal diagnoses included in many of the 17 categories; (2) lacked detailed clinical data on individual patients; (3) would only provide tentative information on the correspondence between the results of the mortality analyses and the actual distribution of hospital quality problems; (4) did not consider alternative approaches; and (5) did not provide the comprehensive, systematic assessment needed to estimate the effect of any resulting deficiencies on the quality of care. This item ships from La Vergne, TN. Paperback.
