Reviews

Definitely among the best book I have possibly read. I have study and i am sure that i will going to go through once more once more later on. Your lifestyle span is going to be convert when you full looking at this publication.

(Prof. Damon Kautzer III)

MICRO TOTAL ANALYSIS SYSTEMS 2002

Book Condition: New. Publisher/Verlag: Springer Netherlands | Proceedings of the miTAS 2002 Symposium, held in Nara, Japan, 3-7 November 2002 Volume 2 | The Sixth International Conference on Miniaturized Chemical and Biochemical Analysis Systems, known as ILTAS2002, will be fully dedicated to the latest scientific and technological developments in the field of miniaturized devices and systems for realizing not only chemical and biochemical analysis but also synthesis. The first ILTAS meeting was held in Enschede in 1994 with approximately 160 participants, bringing together the scientists with background in analytical and biochemistry with those with Micro Electro Mechanical Systems (MEMS) in one workshop. We are grateful to Piet Bergveld and Albert van den Berg of MESA Research Institute of the University of Twente for their great efforts to arrange this exciting first meeting. The policy of the meeting was succeeded by late Prof. Dr. Michael Widmer in the second meeting, ILTAS'96 held in Basel with 275 participants. The first two meetings were held as informal workshops. From the third workshop, ILTAS'98 (420 participants) held in Banff, the workshop had become a worldwide conference. Participants continued to increase in ILTAS2000 (about 500 participants) held in Enschede and ILTAS2001 (about 700 participants) held in Monterey. The number of submitted papers also dramatically increased in this period from 130 in 1998, 230 in 2000 to nearly 400 in 2001. From 2001, ILTAS became an annual symposium. The steering committee meeting held in Monterey, confirmed the policy of former ILTAS that quality rather than quantity would be the key-point and that the parallel-session format throughout the 3. | Exploring fet Concepts for Lab-on-a-Chip.- Monitoring of Cell Growth, Oxygen and ph in Microfermentors.- Observation of Response to Stimuli in Oscillating Cells Patterned by Microfabricated Structure.- On-Chip Agarose Microchamber (AMC) Array Cell-Cultivation System for Topographical Control of...
